Together, we connect growth

datamena

datamena is a provider of data centre and connectivity solutions dedicated to enabling the growth and success of customers in the Middle East.

Connectivity
Low-latency connectivity to support your growth across the region

Data Centre
Highly secure and reliable environment for your mission-critical infrastructure

Teleport
State-of-the-art satellite services for broadcasting, internet and data services across five continents

Exchanges
Efficient peering for connecting to carriers, service providers, cloud and content providers

Carriers
Rapid access to local, regional and global interconnect partners

Content Providers
Bringing content closer to the consumer with low-latency access to high-growth markets

Cloud Providers
The scalability and partner ecosystem to match your growth ambitions

Enterprises
Efficient access to the infrastructure and expertise to support your business success
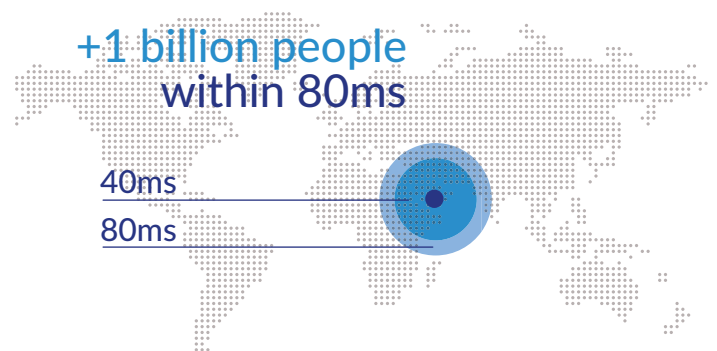

Our Business

- 44,000 square feet data centre facility in Dubai

- Connect to world-leading Carriers, Cloud and Content Providers, and Enterprises from a single location

- +1 billion people within 80 milliseconds of our facility

- Part of a platform of over 100 data centres globally, operated by Equinix under one SLA

- Access a fully redundant backbone to international submarine and terrestrial cables

- Home to UAE Internet Exchange (UAE-IX)

"We remove the complexity from doing business in the Middle East and give our customers a platform where they can meet, interconnect and do business together."
